

**SHORETEC**® LLC specializes in erosion control, through the use of quality concrete products. **SHORETEC**® products are used to provide protection for underlying soil materials. **SHOREBLOCK**® and **SHORELOC**® are matrices of individual concrete block placed together to form an erosion-resistant overlay. **SHOREBLOCK**® products possess specific hydraulic performance characteristics. Both products have proven to be effective erosion-control solutions, with a wide variety of applications. For more information about **SHORETEC**® and products, please visit our website at [www.shoretec.com](http://www.shoretec.com).

### Shoreblock® SD Series

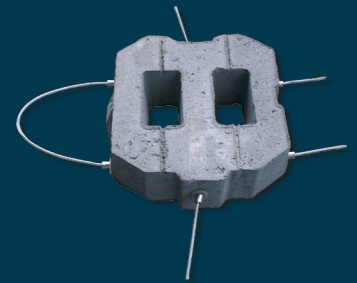

Our SD Series is a durable, effective and environmentally-friendly, erosion control revetment method of fighting severe erosion problems. Shoreblock SD is available in eight foot widths in lengths up to 40 feet.

### Shoreloc® Hand-Placed Series

Shoreloc is used to provide protection for underlying soil materials. The individual blocks conform to changes while remaining interlocked by virtue of the geometric shape of each block.

\*NOW AVAILABLE IN GREEN\*

### Shoreblock® BD Series

Our BD Series is a flexible, interlocking matrix of concrete blocks of uniform size and weight connected by a series of bi-directional corrosion resistant cables allowing the Shoreblock system to articulate with unequalled strength and stability.
